Wordpress

EMPLOYMENT HISTORY

Full Stack Developer at Meta Interactive

May 2021 — March 2024

Responsible for developing full-fledged websites from figma or sketch3 to custom Wordpress Themes and custom Gutenberg blocks. I implemented Advanced Custom Fields in all of my projects, and made use of the Wordpress REST API where needed. Some projects involved converting static sites to Wordpress sites.

Senior Software Engineering Tutor at Tripleten

January 2021 — Present

As the Senior Expert Tutor my job involves a mix of tutoring and managing. It is my duty to stay up to date with course material which means being well versed in React, and Node along with the course projects. I hold instructional Zoom webinars with students, making sure to be interactive and keep the students engaged. I am also involved with the planning of course material and creating solutions to continue improving the program.

Full Stack Developer at Doctor Multimedia

February 2020 — March 2021

I worked with ACF and custom post types on dozens of projects. I used tools such as Salesforce and Freshdesk to keep good communication with clients in order to assure that they were satisfied with my work. In addition I was able to help the development team streamline their workflow by developing a custom package to deploy new sites, and create a useful chrome extension for internal use.

Wordpress Web Developer at Premiere Brand

May 2018 — February 2020

My daily tasks usually involved developing or updating client sites to fit their functional and aesthetic needs, adding custom code to Wordpress sites. I managed a number of in house sites such as mydashuri.com, an e-commerce site. At project completion I was also tasked with taking the site live onto a number of hosting services including AWS, GoDaddy and Siteground.

EDUCATION

Tripleten Software Engineering Bootcamp

January 2021 — Present

As a Senior tutor for the 10 month Software Engineering course by Tripleten, I was able to level up my own skills. This helped me to further develop my skills in modern CSS concepts such as grid and flex, and learn up to date best practices that I can put into use in my React and Node + Express projects.
