SKILLS / TECH

Javascript	Figma
Typescript	React
HTML	Node
CSS	Express
PHP	MongoDB
Sass/SCSS	Wordpress

FLAGSHIP PROJECTS

lasik.com

Delivered a scalable, accessible, and high-performing web platform, architected with custom React components and ES6 modules. Achieved a 90+ Lighthouse accessibility score while giving editors flexible content control through structured configuration layers.

give.vanguard.edu

Built a modular interface with reusable React components, dynamic animations, and lazy-loading for performance. Designed for maintainability with a focus on scalability and UX consistency.

quiz.yourbeerfriend.com

Developed a JavaScript driven lead generation app using weighted logic, JSON configuration, and API-based CRM integration, resulting in measurable conversion growth.

uhc.qualisight.com

Engineered a multi-tenant architecture enabling rapid deployment across brands with unique configurations, achieved with configuration layer allowing cloning without touching core code.

TLDR

Full Stack Software Engineer and Senior Wordpress Developer with **over 7 years of experience** building high-performance web solutions. Has led projects for high profile brands such as **LASIK, United Healthcare, Vanguard University, and Volvo.**

EXPERIENCE

Senior Full Stack Engineer at Meta Interactive from May 2021 to Feb 2024 Long Beach, CA (Remote)

- + Built custom full-stack architectures and component libraries in **React, ES6+ JavaScript, jQuery and PHP** implementing dynamic data models and modular systems.
- + Translated complex **Figma and Sketch 3** prototypes into pixel-perfect, responsive interfaces with reusable UI patterns and strong **accessibility (WCAG 2.1 AA)**
- + Engineered and deployed enterprise-grade applications using structured staging, testing, and production environments
- + Partnered with design and strategy team to ensure UI/UX fidelity, Core Web Vitals compliance, and best practices in front-end architecture

Senior Software Engineering Tutor at Tripletten from Feb 2021 to June 2025 Remote

- + **Mentored** and instructed hundreds of engineers in **React, Node.js, CI/CD, Github Actions, and full-stack application development**, reinforcing strong fundamentals in algorithms, data structures, and modern JS patterns.
- + **Led live coding webinars, code reviews, and pair-programming sessions** focusing on React, REST APIs, and state management.
- + Authored reusable project templates, instructional modules, and internal documentation to standardize curriculum delivery and code quality.

Full Stack Developer at Doctor Multimedia from Nov 2019 to Feb 2021 San Diego, CA (Remote)

- + Developed custom **data-driven interfaces and interactive front-end tools** in **JavaScript, PHP, and Sass**, integrating third-party APIs.
- + Built internal productivity tools including a **custom deployment package and Chrome extension**, reducing build times by over 30%.
- + Collaborated closely with stakeholders across healthcare clients to modernize digital experiences, **enhance SEO, and improve accessibility scores.**

Full Stack Web Developer at Premiere Brand from June 2018 to Nov 2019 Philadelphia, PA

- + Delivered responsive, high-performance websites using **HTML5, CSS3, and JavaScript ES6**, integrating complex animation and data-driven components.
- + Deployed and managed projects via **AWS and SiteGround**, implementing best practices for site reliability, version control, and deployment automation.
- + Supported UI/UX enhancements through iterative development cycles and client collaboration.
